Interpretation layer Reads the data above. Direction arrows (▲▼) show motion; impact colour (red/green border) shows whether motion is good or bad for the economy.

PRODUCTIVITY SIGNAL

IIP Mar +4.1%

Decelerated from 5.2% Feb but positive.

Manufacturing slowed; mining still weak; electricity stable. Eight-Core -0.4% Mar warned this. Productivity proxy: positive but losing momentum.

DEMAND SIGNAL

GST · UPI · vehicle · April mo strong

GST Apr ₹2.43 L Cr +8.7% YoY (record). UPI Apr 22.35 bn txns (+25%) / ₹29.03 L Cr (+21% YoY). Vehicle retail Mar 2.69 mn.

Consumption strong despite oil/INR shock. UPI daily avg jumped to 745 mn (from 730 mn Mar). GST imports +25.8% YoY confirms supply-chain absorbing oil bill.

INFLATION / COST SIGNAL

CPI 3.40% · WPI 3.88% · Brent \$120+ · ATF >₹2L

WPI jumped from 2.13% to 3.88% on +8.77% mineral oils. CPI Apr likely >4% (ICRA).

Easy disinflation phase ending. RBI's 4% target under pressure. Brent spike to \$120+ will feed through with 6-8 week lag. Airline costs (ATF) and edible oils worst hit.

LABOUR SIGNAL

Unemployment 5.1% Mar · Naukri 3045 Apr · PMI jobs

UR rose 0.3 pp Feb→Mar. Naukri private hiring index recovered to 3045. Apr PMI flash showed jobs at 10-mo high.

Mixed: official UR softer but private indices firm. Job creation in services + IT post Q4 results.

LIQUIDITY / MARKET SIGNAL

Liquidity +₹4.09 L Cr · 10Y 7.02% · INR 94.91 · FX -\$4.81 bn

Liquidity flipped to massive surplus. RBI did ₹2 trn VRRR. But

RBI defending INR via FX intervention drains reserves. Surplus

yields rose to 7.02%.
INR closed 94.91 with
intraday low 95.33. FX
reserves fell \$4.81 bn
WoW.

*liquidity + rising yields
= curve steepening

SECOND-ORDER EFFECTS

Energy/Trade chain

Hormuz tension →
Brent \$120+ → INR
weakens → import bill
widens → trade deficit
risks → RBI sells
dollars → FX reserves
fall → liquidity
tightens despite
